

# LUBRICANTS SPECIFICALLY FOR CLASSIC CARS

**DRIVEN BY EXPERIENCE.**

N O V E C E N T O

Agip Novецento is an Eni product line

The long time established Eni Refining & Marketing Quality Management System obtained the updated UNI EN ISO 9001:2015 certification about commercial and industrial processes covering the whole lubricant and additives industrial cycle and including project design, process development, supplying activities, production operation, blending, packaging and client delivery.

Introducing **Agip Novецento**, a line of dedicated Eni lubricants for classic cars. Having a background in the great motoring era, these lubricants are based on Italian motoring lifestyle and convey emotion and exclusivity.

The new **Agip Novецento** range is the result of expertise that has been acquired over time thanks to our involvement in the motoring world, in competitions and in classic car races, thus establishing values like style and excellence as well as the quality and technology of the products.

These special motor oils ensure **excellent performance** levels to passionate and collectors of classic cars. Also thanks to the numerous partnerships **Agip** had in the past with some of the most **prestigious car manufactures**.

This means that our lubricants are based on customised formulas with specific characteristics as recommended by the manufacturers at that time.

The choice of lubricants is a key element to **ensure the ultimate protection** and **performance** under extreme operating conditions required by classic cars.

Modern lubricants are developed according to the latest engine technologies and requirements, such as low fuel consumption, reduction of emissions, long drain intervals and compatibility with exhaust gases after-treatment systems.

The characteristics of modern lubricants do not make them optimal to satisfy the needs of classic cars.

Classic cars, compared to their modern counterparts, have greater clearance between mechanical parts, due to both high mileage and original construction tolerances as, for example, piston-cylinder clearance.

That is why **Agip Novецento** line offers products with a high viscosity at high temperature ensuring a thick protective film between the moving parts, reducing wear and oil consumption.

The selected additive technology for the **Agip Novецento** engine oils makes these lubricants compatible with elastomers and metals used at the time, and **provides unique anti-oxidant, anti-rust and anti-foaming properties.**

The new **Agip Novecento** product range is an offspring of Eni's continued tradition in the lubricants field: the **extensive technical know-how** and **experience** has been preserved and passed on to the new generation of lubricants with a focus on innovation and continuous improvement.

The engine oil formulations are aimed at capturing specific requirements:

- for **historical racing vehicles** the products have been designed with specific technical features to protect engines under extreme conditions.
- for **vehicles subject to normal use**, engine oils have been split into **three categories (1900-1950 / 1950-1970 / 1970 -1990)** according to the age of the vehicle. For each of these categories engine oil formulation have been specifically developed.

For exhibition cars or engines that remain inactive for long periods we have developed a protective oil: **Agip Novecento Protettivo**

For **transmission lubricants** (gearboxes, differentials and transaxles) specific lubricants were developed taking into account the type and age of the transmission, the gear construction and the materials used.

# AGIP

# ENGINE OILS

N O V E C E N T O

## AGIP NOVECENTO 40

Mineral monograde lubricant for petrol  
and diesel engines manufactured  
between **1900** and **1950**.

# 40

1LT

4LT

30LT

PERFORMANCE

OUTSTANDING HIGH TEMPERATURE PERFORMANCE

EFFECTIVE PROTECTION OF MOVING ENGINE PARTS

HIGH ANTI-CORROSION PROPERTIES

# AGIP

## AGIP NOVECENTO 50

Mineral monograde lubricant for petrol  
and diesel engines manufactured  
between **1900** and **1950**.

# 50

1LT

4LT

30LT

PERFORMANCE

OUTSTANDING HIGH TEMPERATURE PERFORMANCE

EFFECTIVE PROTECTION OF ALL MOVING ENGINE PARTS

HIGH ANTI-CORROSION PROPERTIES

LOW OIL CONSUMPTION IN CARS  
WITH SIGNIFICANT HIGH MILEAGE

# AGIP

# ENGINE OILS

N O V E C E N T O

## AGIP NOVECENTO 20W-50

Mineral multigrade lubricant for petrol  
and diesel engines manufactured  
between **1950** and **1970**.

# 20W-50

1LT

4LT

30LT

PERFORMANCE

RESISTANT AGAINST THERMAL DEGRADATION

EXCELLENT ANTI-WEAR CHARACTERISTICS

HIGH ANTI-CORROSION PROPERTIES

# AGIP

## AGIP NOVECENTO 15W-50

Mineral multigrade lubricant for petrol  
and diesel engines manufactured  
between **1970** and **1990**.

# 15W-50

1LT

4LT

30LT

PERFORMANCE

PERFECT LUBRICATION OF ALL MOVING ENGINE PARTS

EXCELLENT ANTI-WEAR CHARACTERISTICS

HIGHLY RESISTANT TO THERMAL AND MECHANICAL STRESS

# AGIP

## AGIP NOVECENTO RACING 10W-60

Top full synthetic engine oil for high performance classic cars, engineered using the expertise from motor sports events on the road and on the track.

# 10W-60

1LT

4LT

30LT

PERFORMANCE

EXCELLENT VISCOSITY CHARACTERISTICS IN A WIDE TEMPERATURE RANGE

EXTREME RESISTANCE TO HIGH MECHANICAL ENGINE STRESS

HIGH PROTECTION EVEN UNDER EXTREME CONDITIONS

# AGIP

# PROTECTIVE LUBRICANT

## AGIP NOVECENTO PROTECTIVE LUBRICANT

Classic cars that are stored for a long time, require a specific care. During the periods of inactivity, humidity may condense as microscopic droplets in many parts of the engine creating corrosion.

Thanks to its excellent protective properties,  
**AGIP NOVECENTO PROTECTIVE LUBRICANT**  
prevents the consequences of this harmful phenomenon,  
and protects the engine during storage.

IDEAL FOR EXHIBITION  
CLASSIC CARS

## AGIP NOVECENTO 90

Mineral transmission lubricant formulated  
to achieve high levels of protection from wear.

90

1LT

4LT

PERFORMANCE

EXCELLENT ANTI-WEAR PROPERTIES

SUPERIOR ANTI-FOAMING PROPERTIES

OXIDATION AND CORROSION RESISTANT

EFFECTIVE PREVENTION OF DEPOSITS

## AGIP NOVECENTO 80W-90

Mineral transmission lubricant, suitable for use  
in manual gearboxes and differentials, with excellent  
Extreme Pressure (EP) performance.

# 80W-90

1LT

4LT

PERFORMANCE

OUTSTANDING EXTREME PRESSURE PROPERTIES

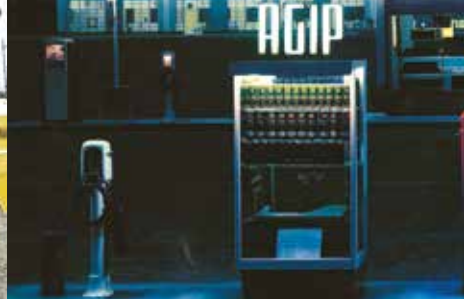

HIGH OXIDATION STABILITY

CORROSION RESISTANT

SUPERIOR ANTI-FOAMING PROPERTIES

# AGIP

## AGIP NOVECENTO 85W-140

Mineral lubricant for manual transmissions,  
with excellent Extreme Pressure (EP) performance.  
Recommended also for hypoid gears.

# 85W-140

1LT

4LT

PERFORMANCE

OUTSTANDING EXTREME PRESSURE PROPERTIES

HIGH OXIDATION STABILITY

CORROSION RESISTANT

SUPERIOR ANTI-FOAMING PROPERTIES

# FUEL ADDITIVE

## AGIP NOVECENTO FUEL ADDITIVE

A fuel additive (lead replacement) for the protection of valve guides and seats of classic car engines without catalytic converter.

125 ML

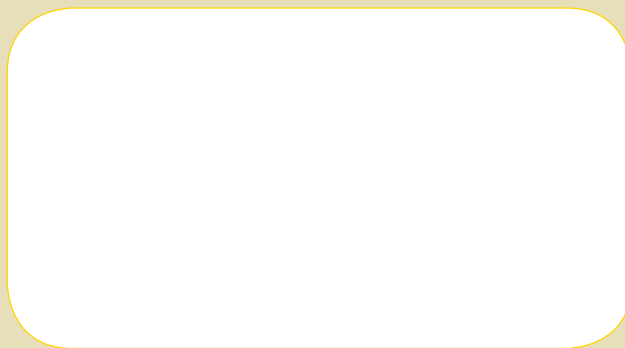

PERFORMANCE

EFFECTIVE PROTECTION OF ENGINE VALVES  
AND THEIR SEATS PREVENTING WEAR

NO FORMATION OF DEPOSITS IN THE COMBUSTION CHAMBER

APPROPRIATE LUBRICATION OF CYLINDER HEAD
