# WHO

**Eni** is an integrated energy company, with a strong position in the **oil&gas value chain**, from the hydrocarbon exploration phase to the product marketing.

Our strong presence in the **gas and natural gas markets**, strengthened by world class skills in **engineering** and **project management**, allows us to catch opportunities in the market and realize integrated projects and value.

**Enilive**, fully owned by Eni, is more focused on biorefining and commercialization of products for increasingly sustainable mobility.

# Enilive Aviation Business

**Eni** has been supplying oil products to the aviation industry since 1961 when, on April 1<sup>st</sup>, it carried out its first fueling operation on an Alitalia DC8 aircraft at FCO.

**Enilive** activities in the aviation sector:

- The sale of both Jet A-1 and SAF
- The provision of technical and operating assistance and training to a wide range of operators in Italy and abroad.

**Enilive** aviation business has achieved **UNI EN ISO 9001** certification for its Quality Management System. It is a strategic partner of the International Air Transport Association (**IATA**) as well as a guarantor member of **JIG** (Joint Inspection Group).

# OUR TARGETS

## AIRLINES

Operating in airports served by Enilive.

## GENERAL AVIATION

Sales to private aircraft owners and corporate fleets.

## RESELLERS OF AVIATION PRODUCTS SUPPLYING AIRLINES & OTHERS

Reselling to operators for airlines, but also for search and rescue and air ambulance helicopter operators, the armed forces, the Italian civil protection department, aviation clubs, operators of helicopters for aerial surveys and holders of Aviation Cards.

## THE PUBLIC SECTOR

Direct sales to aviation units of the armed forces, fire services and police.

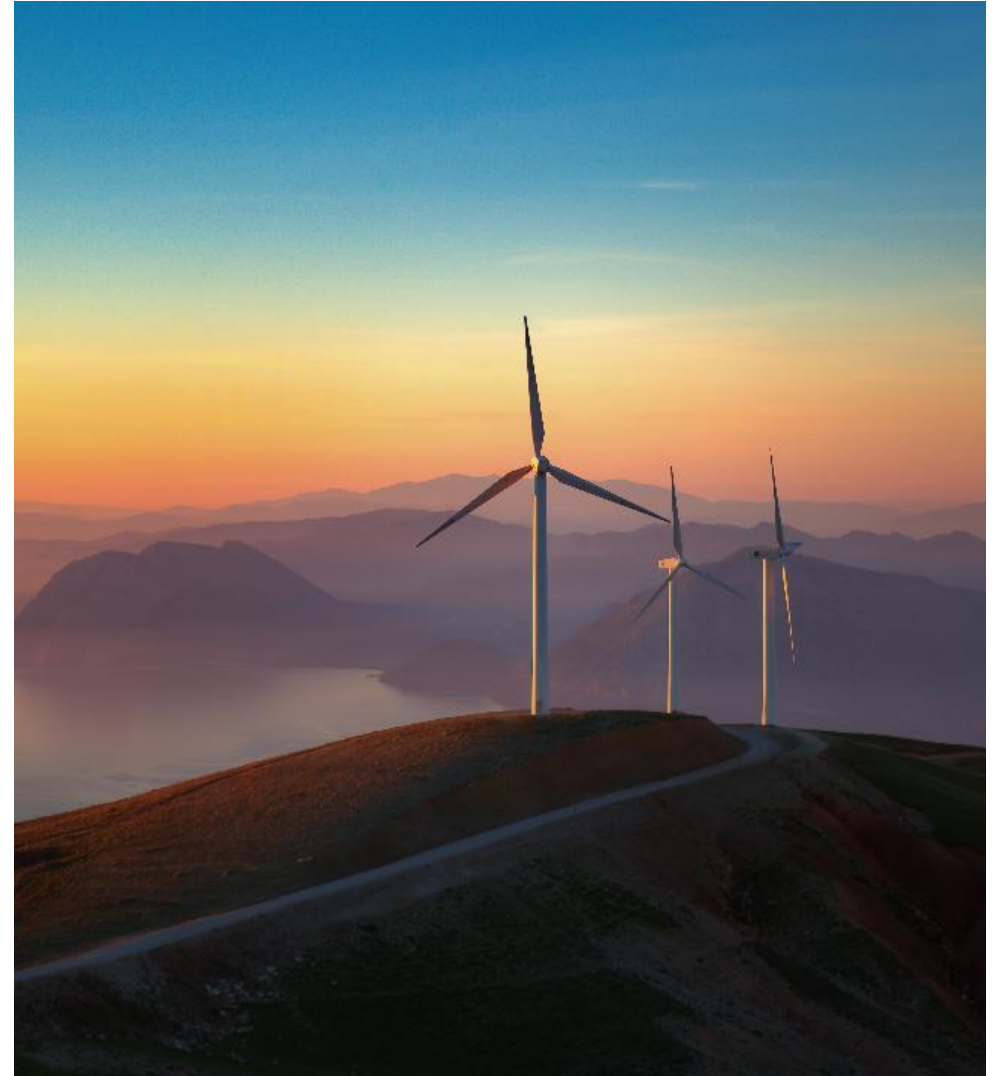

# WHAT

## **JET A1**

Aviation Fuel Quality meeting the latest issues of the following fuel specifications:

## **SAF**

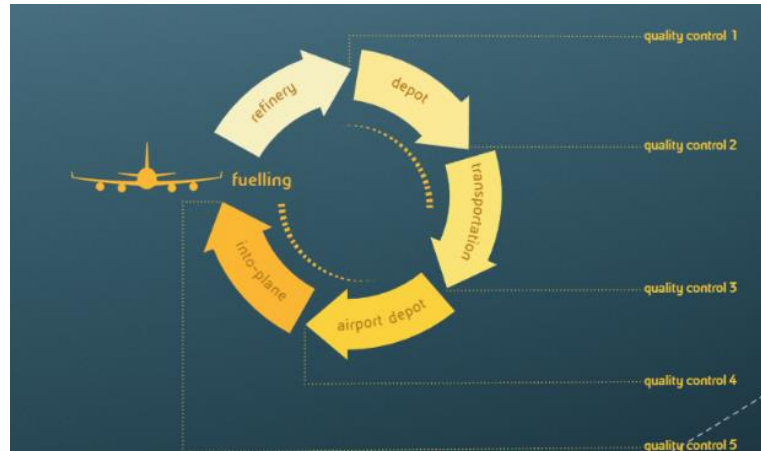

- British Ministry of Defence Standard DEF STAN 91- 091;
- ASTM Standard Specification D1655;
- ASTM Standard Specification D7655.

# HOW

## From the refinery to the aircraft

- Manufacture of Aviation Fuel (Jet-A-1, Sustainable Aviation Fuel) fuel in Eni's facilities, ensuring full compliance with the most stringent requirements for quality assurance, controls and operating standards, i.e., JIG Standards, EI/JIG1530 and EI/JIG1533.
- In addition, through its qualified JIG Inspectors, ENI is committed to ensuring the correct application of all the mandatory requirements addressed by the above Standards by periodic inspections carried out to aviation fuel storage facilities (refinery, intermediate depots, airport depots, etc..) and into-plane service provider.
- Aviation fuel facilities and into-plane operators are also checked against the JIG HSSE Management System Checks through a 3-yearly external audit along an internal annual audit.

## Technical assistance

- Eni's JIG Inspectors and relevant personnel supplies **aviation quality technical support** in compliance with the requirements laid down by the Joint Inspection Group (JIG)
- The basic service includes:
  - Preliminary studies to evaluate technical and operational feasibility, support for the design of facilities, equipment and vehicles handling aviation fuel;
  - Training in the classroom along with practical parts (i.e., how to correctly inspect an aviation fuel filter FWS, WBF, DDF, etc.);
  - Supply of Quality Assurance and Operating Manual for aviation fuel facilities and into-plane operations;
  - Where deemed, additional Insurance coverage for fuelling operations with a maximum coverage limit of USD 1 billion;
  - Supply of fuel handling data management software.

Additional/taylored trainings and HSSE audits are provided on request.

# WHERE

## Our connections to the world

We believe in the value of long-term partnerships  
with the countries and communities where we  
operate,  
bringing long-lasting prosperity for all.
